

TOP PIECE HAIR SYSTEM MEASUREMENTS

This tutorial will guide you thru the process of submitting the needed measurements for a custom hair system. This method should only be utilized if there is no other possible way of providing a fitting method.

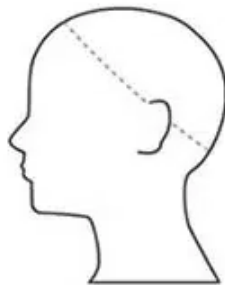

Measuring your head contour

STEP #1

Finding your hairline mark

To find your hairline mark, raise up your eyebrows as if you were looking up at the ceiling. Crinkle your brow and slide your finger over your forehead until you feel where the fatty tissue meets the leaner cranial tissue. Place a mark over your finger.

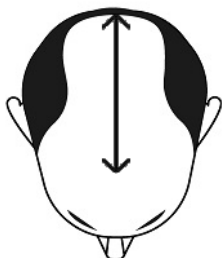

STEP #2

Taking your measurement

Measure the circumference of your head from the middle of your forehead, above the occipital bone in the back. Be sure to pull the measuring tape tight for an accurate measurement

WRITE YOUR MEASUREMENT

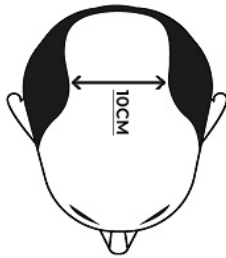

Measuring your hair loss base size

STEP #3

Front to Back

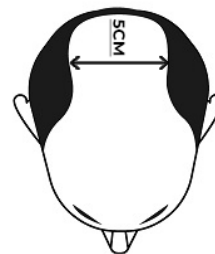

Measure from the back balding area edge to the front hairline

STEP #4

Front Width

Measure side-to-side starting 10cm behind the front hairline

STEP #5

Front to Back

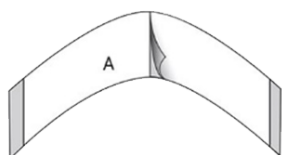

Measure side-to-side 5cm towards the front hairline

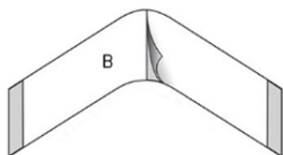

STEP #6

Choosing your frontal hairline contour

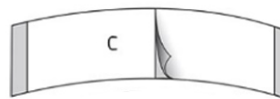

mark your selection
